

My Chess Game

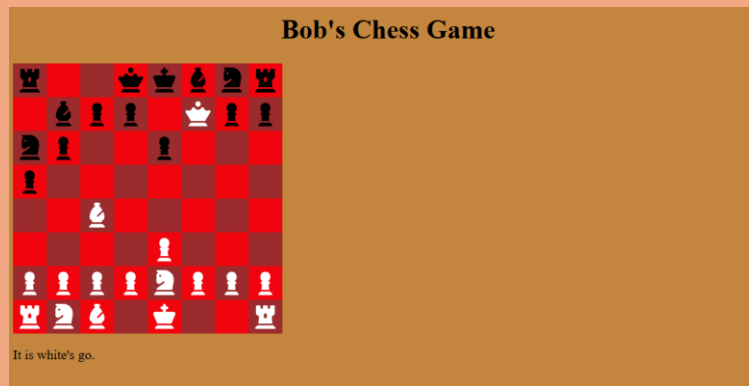

At the bottom of the board, it indicates who's turn it is

- We see, "It is white's go."

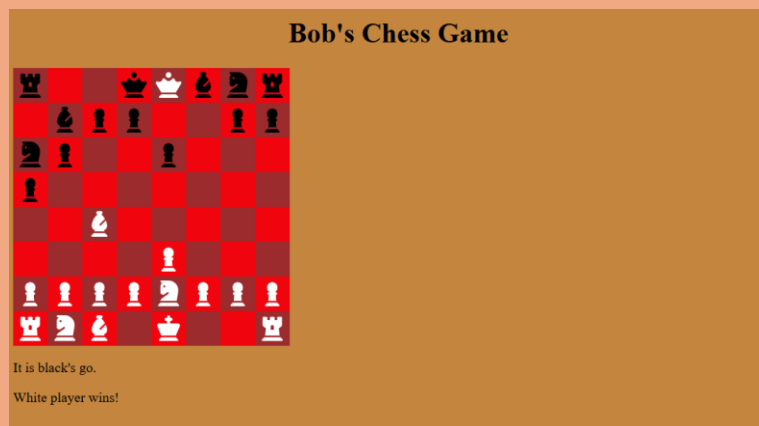

If a player makes an illegal move, a message at the bottom appears indicating "you cannot go here!"

In my version of the classic game, Chess, you have to kill the king to win

- It isn't enough to just trap it
- As you can see, there is no message that white won yet

- After killing the king with the queen, we see that at the bottom of the board, it indicates that “White player wins!”

Thank you for taking the time to view my version of the classic game, Chess

- *Bobby*
